(57)Abstract:

PROBLEM TO BE SOLVED: To make generable a book mark having a retrieved result sorted for every retrieving condition of retrieval by a retrieving engine by displaying a title and/or URL under every retrieving condition by using link information.

SOLUTION: A retrieved result output means 22 acquires a list of titles and URLs of home pages corresponding to a retrieving condition from a retrieving engine 5, stores the acquired list in a retrieved result storage part 32 and outputs the data to an output device 4. A book mark registering means 24 acquires the title and URL of a home page of which book mark registration is specified by a user and stores the acquired contents in a title storage part 33. A keyword to be a retrieving condition is acquired and stored in a keyword storage part 34. At this time, correspondence relation among the keyword, the title and the URL is also stored. A book mark output means 25 obtains a list of titles of corresponding home pages from the title storage part 33 in each stored keyword and outputs the list to the output device 4.
